

Electric deck oven for pizza

2 decks composition

iDeck consists of one or two baking chambers and an optional prover or stand. The oven's baking surface is made of refractory material, providing the perfect heat distribution over the whole surface. This oven is particularly suitable for direct or indirect pizza baking. Temperature adjustment is electro-mechanical, with independent control of the ceiling and floor heating elements. The oven door is hinged at the bottom, with a tempered glass window to check the product during baking. The stand consists of a painted metal structure, while the prover is a stainless steel cabinet equipped with a heating thermostat. The prover can reach the maximum temperature of 65°C(149°F), whereas the maximum temperature of the baking chamber is 450°C (842°F).

CEFFE

FUNCTIONING

- Heating by armoured heating elements
- Separate heating element control by mean contactors that are controlled by thermostats
- Maximum temperature reached 450°C
- Continuous measurement of temperature by probe indicator

CONSTRUCTION

- Front structure made in folded stainless steel
- Oven panels made pre-painted metal sheets
- Door in stainless steel with shutter with hinge at bottom with balancing spring
- Door handle in stainless steel
- Tempered crystal glass
- Control panel on the right front side
- Baking surface in refractory brick
- Upper and lateral structure in aluminized sheet
- Thermal insulation in mineral wool

BAKING ELEMENT INTERNAL DIMENSIONS

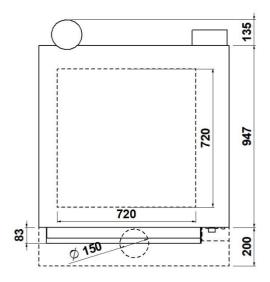

STANDARD EQUIPMENT

- Illumination by halogen lamp
- Independent maximum temperature safety device (only electronic version)

ACCESSORIES

- Prover on wheels height 700, 1000 mm
- Stand height 600, 900 mm
- 4 wheels kit
- Additional trayholder slides
- Stacking kit
- Hood
